

About me

Enterprise UX designer with 10+ years turning complex technical systems into products people find easy to use, including digital twins of physical data center infrastructure. I lead design strategy across Equinix's Console, CRH, IAM and Solution Designer platforms, covering research, systems, interaction and visual design from first interview to launch. Recently focused on AIUX: evaluating complex spaces to surface interaction patterns, designing for ML capabilities/limitations (hallucination, confidence, grounding), and building human-AI collaboration workflows. I partner closely with product, engineering and architecture, and use AI-assisted prototyping (Claude Codex, Cursor, Gemini) to move from research to validated POCs faster.

AIUX LAB — HUMAN-AI COLLABORATION EXPERIMENTS

MOTIF

AIUX Repertoire

18 agent skills, 12 deck styles, 55 prompts. Evaluated complex spaces to surface patterns into transitionable pattern technology for AI agents.

MANTRA LOUNGE

Designing for Model Limitations

30+ videos, 5k+ views. Built verification timeline for hallucination, confidence signals, human-as-director workflow with Suno + Claude + ffmpeg.

DATA CENTER PROTOTYPE

Human-AI Workflow

Claude-accelerated prototype from weeks to days. Grounded in product catalog (power/cooling/SKU) to prevent hallucinations — e.g., only fiber tray connects to Express Exits. Designed confidence & provenance UX.

SIGNATURE PROJECT

Solution Designer Equinix data center digital twin

Interviewed sales engineers, customer project managers and order managers, then unified 12+ tools into one SFDC-connected flow. **Designed for ML hallucinations in communication layer for Private Cage:** Claude overgeneralized that fiber/basket/copper trays all connect to Express Exits because they all support overlay. Reality: only fiber connects. Non-valid overlay = wrong cabinet = wrong quote. Grounded generation in product catalog as fixed source of truth with validation rules, and designed UX with provenance (why basket/copper disabled + spec link) and human-in-the-loop review.

3× faster design-to-order | 2× fewer order errors | 95% → 30% projects needing SE-CPM

Experience

Senior UX Designer

2020 – Present

Equinix

- **Platform strategy:** Lead UX strategy across Equinix's customer platforms, Console, CRH, IAM and Support Center, including data center digital twins.
- **Solution Designer:** Led research and UX for the digital twin (12+ tools → 1 SFDC-connected flow, 3× faster, 2× fewer errors). Designed for ML hallucinations — e.g., Claude overgeneralized that fiber/basket/copper trays all connect to Express Exits; grounded generation in product catalog as source of truth (only fiber connects), with validation rules, provenance UX (why basket/copper disabled + spec link), and human-in-the-loop review to prevent non-deployable designs.
- **Customer Onboarding:** Redesigned the onboarding journey, cutting a core task from 5 clicks to 2.
- **Console navigation:** Restructured information architecture and validated it through usability testing, reducing navigation errors by 40%.
- **IAM and CRH:** Delivered high-fidelity designs that streamlined complex enterprise workflows and reduced user errors.
- **Ways of working:** Partner with product managers, engineers and architects from discovery through launch; plan and run usability testing; create wireframes, storyboards, prototypes; contribute to design system and pattern library.

Lead UX Designer

2018 – 2020

Palo Alto Networks

- **Platform alignment:** Led UX for 12+ web properties serving 2M+ monthly visitors, including BEACON. Evaluated complex spaces to align patterns into a unified design system.
- **Cross-functional leadership:** Partnered with product, engineering, and executive stakeholders to ship consistent enterprise experiences.

Senior UX Designer

2008 – 2018

Cisco Systems

- **InTouch Feedback:** Designed rating & feedback features enabling 5,000+ user reviews; informed product improvements through usability studies.
- **Recognition:** Received the Cisco Pioneer Award and Cisco Cosmo Award for collaboration and feedback platform work.

Senior Web Designer

2006 – 2008

HP

- **Smart TV:** Designed the 10-foot UI for HP's Smart TV, optimized for viewing from across the room and navigating by remote.
- **Constraints:** Balanced visual quality with responsiveness on slow hardware, delivering within requirements and technical limits.

Skills

Design

Enterprise UX, interaction design, design systems, visual design, data visualization, spatial/3D interaction

Research

Usability testing, stakeholder interviews, contextual inquiry, personas, journey mapping, affinity mapping

Tools

Figma, Webflow, HTML/CSS, Adobe Creative Suite, Lucid, Jira, Confluence

AI

ML limitations, hallucination handling, confidence calibration, human-AI workflows, AIUX repertoire, evaluating complex spaces, Claude Codex, Cursor, Gemini, Figma Make

Languages

English, Mandarin

Education

M.S., Computer Information Systems

Bellevue University

M.A., Communication & Multimedia Design

Saginaw Valley State University

Certified Google AI Leadership

Google

Certified UX Designer

Nielsen Norman Group

Design thinking coursework

Stanford d.school

Awards

Equinix Hackathon, 1st Place

Unified Portal Shopping Experience

Cisco Pioneer Award

Collaboration Learning Intelligence Platform

Cisco Cosmo Award

Cisco InTouch Feedback
